

VP 20S

Assignment #1: Intro to the Equipment and Editing

Goal:

To have each student familiarize themselves with the cameras and the equipment by completing a short video showcasing this knowledge.

Process:

1. Watch a video example of this first project.
2. Listen to a brief talk about using the cameras and filming in the school.
3. Get into a group (no more than four per group).
4. Get a camera from Mr. Manness.
3. Take turns running the camera, directing, and acting.
4. Go out and film two shots of each member of your group posing. Pick different areas for the actors to pose. Try to be creative. You could try Tebowing or planking, if need be.
5. You must have at least one pan and one tilt shot.
6. Bring your footage back to class and upload to the server.
7. Have each group member copy the footage to their local machine.
8. Edit the footage in Adobe Premiere Pro, add a soundtrack and export the final product as an H.264 file (1080p 24 fps).
9. Copy the final product to the Video Production Folder>Assignment. The file should have your name and the project title (for example "John Smith Assignment 1").
10. Pat yourself on the back for a job well done.
